Current Research

- TOPICS
  - Synthetic Populations

Current Research

- TOPICS
  - Synthetic Populations
  - Vector Ecology (mostly mosquitos) + Vector Borne Disease

Current Research

- TOPICS
  - Synthetic Populations
  - Vector Ecology (mostly mosquitos) + Vector Borne Disease
  - Ebola

Current Research

- TOPICS
  - Synthetic Populations
  - Vector Ecology (mostly mosquitos) + Vector Borne Disease
  - Ebola
  - Plant Parasites

Current Research

- TOPICS
  - Synthetic Populations
  - Vector Ecology (mostly mosquitos) + Vector Borne Disease
  - Ebola
  - Plant Parasites
  - Flu intervention

Current Research

- TOPICS
  - Synthetic Populations
  - Vector Ecology (mostly mosquitos) + Vector Borne Disease
  - Ebola
  - Plant Parasites
  - Flu intervention
  - Rabies

Current Research

- TOPICS
  - Synthetic Populations
  - Vector Ecology (mostly mosquitos) + Vector Borne Disease
  - Ebola
  - Plant Parasites
  - Flu intervention
  - Rabies
- APPROACHES

Current Research

- TOPICS
  - Synthetic Populations
  - Vector Ecology (mostly mosquitos) + Vector Borne Disease
  - Ebola
  - Plant Parasites
  - Flu intervention
  - Rabies
- APPROACHES
  - general curve model selection / fitting

Current Research

- TOPICS
  - Synthetic Populations
  - Vector Ecology (mostly mosquitos) + Vector Borne Disease
  - Ebola
  - Plant Parasites
  - Flu intervention
  - Rabies
- APPROACHES
  - general curve model selection / fitting
  - compartment, network, and agent-based models

Current Research

- TOPICS
  - Synthetic Populations
  - Vector Ecology (mostly mosquitos) + Vector Borne Disease
  - Ebola
  - Plant Parasites
  - Flu intervention
  - Rabies
- APPROACHES
  - general curve model selection / fitting
  - compartment, network, and agent-based models
  - MCMC maximum likelihood fitting

Current Research

- TOPICS
  - Synthetic Populations
  - Vector Ecology (mostly mosquitos) + Vector Borne Disease
  - Ebola
  - Plant Parasites
  - Flu intervention
  - Rabies
- APPROACHES
  - general curve model selection / fitting
  - compartment, network, and agent-based models
  - MCMC maximum likelihood fitting
- TEACHING: Computation in Applied Mathematical Sciences w/ AIMS-Ghana

Toolkit

- Principle Languages: Scala, R, C++, Python, SQL, Unix CLI

Toolkit

- Principle Languages: Scala, R, C++, Python, SQL, Unix CLI
- Secondary: Perl, C, FORTRAN, assorted JavaScript relatives, assorted markup/styling (HTML, CSS, LaTeX, Markdown + weaving, *etc.*)

Toolkit

- Principle Languages: Scala, R, C++, Python, SQL, Unix CLI
- Secondary: Perl, C, FORTRAN, assorted JavaScript relatives, assorted markup/styling (HTML, CSS, LaTeX, Markdown + weaving, *etc.*)
- Assorted libraries / modules / packages in the above

Toolkit

- Principle Languages: Scala, R, C++, Python, SQL, Unix CLI
- Secondary: Perl, C, FORTRAN, assorted JavaScript relatives, assorted markup/styling (HTML, CSS, LaTeX, Markdown + weaving, *etc.*)
- Assorted libraries / modules / packages in the above
- Dev. Tools: atom, Eclipse, RStudio, PyCharm, git + github, Torque-based supercomputer, assorted SQL flavors

Toolkit

- Principle Languages: Scala, R, C++, Python, SQL, Unix CLI
- Secondary: Perl, C, FORTRAN, assorted JavaScript relatives, assorted markup/styling (HTML, CSS, LaTeX, Markdown + weaving, *etc.*)
- Assorted libraries / modules / packages in the above
- Dev. Tools: atom, Eclipse, RStudio, PyCharm, git + github, Torque-based supercomputer, assorted SQL flavors
- Wants: GIS, MPI
